### Your advantages

- When you have to go into hospital, you'll be able to choose on admission which ward you'd like to stay in. This all depends on the reason for treatment and treatment length, your progress and needs.
- You'll benefit from lower monthly premiums than with semi-private or private insurance. In return, you contribute to the costs if you decide to upgrade.
- Cost limit for families: the maximum cost contribution per calendar year is the same for families as for individuals with the same option.
