hospita general; without accident cover

The premiums for kombi allgemein are calculated once upon conclusion of the contract on the basis of the entry age of the policyholders. They are then set in line with general healthcare costs. The premiums for hospital general are calculated based on the age tariff: they increase with the age of the policyholders and the associated risk.

This tariff comparison should give you an easy way of comparing premiums based on the 2020 gross premiums. Any discounts are not taken into account. The premiums of both insurance policies for 2021 will be available from mid-October. As there may be differences, only the premium information in a personal quotation is decisive for the conclusion of the contract.
